NESEA Conference & Trade Show to be held March 9-11

March 03, 2010 - Northern New England

Some 4,000 renewable energy and green building experts will bring their cutting edge thinking to the city on March 9-11 for the BuildingEnergy10 Conference and Tradeshow. BuildingEnergy10 (BE10) is the annual event organized by the Northeast Sustainable Energy Association (NESEA). Now in its 35th year, BuildingEnergy is one of the oldest and largest regional building energy and renewable energy events in the country, with participants coming from across the northeast - from Maine to Washington, D.C.

The conference includes 63 sessions and 20 full and half-day workshops. The tradeshow floor will feature 160 exhibitors and the latest technologies, products and services.

The theme of this year's BE10 is "Reduce, Retrofit, and Renew." Betsy Pettit, FAIA, of Building Science Corp., the conference chair for BE10, said the theme is particularly timely as more of us look for ways - big and small - to reduce our carbon footprint.
