Greenskies Renewable Energy opens headquarters

May 26, 2010 - Green Buildings

Greenskies Renewable Energy LLC has opened its headquarters at 10 Main St. in the Landmark Sq. building. Formed in 2009 by Robert Landino, PE, Michael Silvestrini, and Art Linares, Greenskies designs, finances, installs, and maintains photo-voltaic (PV) solar systems for residential and commercial properties throughout the northeast and mid-atlantic states. Its current projects include a long term campus wide installation at Assumption College in Worcester, Mass, a ground mount installation at Astro Logistics LLC in Springfield, Mass, and a roof mount installation at Sika Corporation in Canton, Mass. In less than two years of operations, Greenskies Renewable Energy LLC's project pipeline now exceeds seven megawatts.

Greenskies offers comprehensive solar services that mitigate risk and hassle for their clients while providing clean renewable electricity. Most importantly, the Greenskies model allows clients to enjoy the benefits of low-cost renewable energy without having to shift their focus or finances from their own businesses.
