Your empty rooftop or vacant land could be worth millions

May 26, 2010 - Green Buildings

American Capital Energy, private, Boston based, designs/builds "turnkey" commercial/utility scale projects nationally (internationally soon). See "installations" www.americancapitalenergy.com. Atlantic City Convention Center (largest roof mounted solar PV array in North America). Projects are 100 kW to 30+ MW on sites of 20,000 s/f. GUARANTEED POWER GENERATION-systems viable for 30+ years. As price of fossil fuel, associated pollution increases; renewable are the answer.

50 MW under construction, American Capital Energy designs, engineers, procures, installs, all permitting, credit/rebate applications (Federal/State), monitors Financial options include power purchase agreements - Options/benefits provided with quote. Custom design for current/future business plan. Cost of electricity for most companies represents 14-35% of annual fixed costs.

Roof mounted solar provides electric power; surplus electricity sold to the utility-

NEW REVENUE STREAM FOR YOUR COMPANY, while greening the environment).

Utility solar farms generate power for public/private utilities -

NEW WAYS TO MEET INCREASING ELECTRIC DEMAND; reducing use of fossil fuels. (coal, oil, etc).

Customers include:

Commercial refrigerated warehouse (Saved \$20 M in electric costs, 3.6 year ROI), utility scale ground systems, roof/carport mounted solar systems (manufacturers, warehouse/distribution centers, data centers, government, academia; cut carbon footprint and electric costs).

Commercial greenhouse (150 acres, the size of 150 FOOTBALLS fields) - dual (hybrid solar thermal/solar PV); clean electricity/ hot water (180 degrees at site); radiant heat for greenhouses (minimized use of 4 boilers

Companies who commit to sound business practices/ implementation of pollution free "alternative energy" improve their bottom line and the quality of life for unborn generations. Call for your quote: 866-307-5370.
