USGBC's LEED workshop to be held on November 30

November 18, 2010 - Construction Design & Engineering

On Tuesday, November 30, ASM teams up with the U.S. Green Building Council to present a repeat of last year's highly-rated workshop focusing on the role and responsibilities of subcontractors in the LEED process. The workshop will explore in detail the on-the-job requirements affecting various sub-trades - particularly with respect to documentation of materials - and include hands-on exercises as well as small group discussion involving subs, designers and general contractors.
