Wessling designs building envelope restoration for Suffolk University project

February 17, 2011 - Construction Design & Engineering

Building envelope restoration of Suffolk University's 73 Tremont St. is complete. The Aspen Group provided comprehensive project management services, Wessling Architects was the project architect, and construction services were provided by NER Construction.

73 Tremont St. is a 13-story building prominently located at the base of Beacon Hill and houses Suffolk University's executive and administrative offices, faculty offices, and undergraduate library and common area. The project included a complete repointing of the building's Tremont St. facade, as well as sections fronting the historic Granary Cemetery.
