Business Best - North Branch Construction

May 05, 2011 - Northern New England

Since its founding in 1958, North Branch Construction, Inc. has developed into a full service general contractor and construction manager serving New Hampshire and Northern Massachusetts. We have expertise in institutional, commercial, industrial, municipal, high-end residential, multi-unit, design/build and historic renovation projects, with concrete, masonry, wood, and steel construction. North Branch firmly believes that the key to a successful project is teamwork and communication. Quality people make this happen. We have our own in-house, experienced workforce consisting of project managers, supervisors, foremen, carpenters, and laborers. We have a full-time service foreman and part-time service coordinator. This workforce availability and experience results in faster project completion, higher quality, and lower cost for our clients. By consistently maintaining high standards at all levels, we deliver excellent lasting value and top-notch craftsmanship as evidenced by our projects.
