AGC-Mass. and WasteCap Resource Solutions Inc. to hold recycling course on November 17

October 27, 2011 - Green Buildings

On November 17, AGC of Massachusetts in partnership with WasteCap Resource Solutions, Inc. will hold a Recycling Training course for contractors, haulers and recycling professionals at the AGC Conference Center. The program qualifies for continuing education hours required for Green Building Institute credential maintenance.

Owners across the country are requiring construction waste recycling as part of sustainable buildings. This is one more step toward greening the environment. The day-long training will provide participants with the skills to develop manage, monitor, document and promote a successful recycling program for construction projects. The program will run from 8 a.m. to 5 p.m.

AGC of Mass. is a professional construction association representing the majority of firms providing building construction services for commercial and institutional clients in the Commonwealth. The association offers valuable management education and safety training programs, on-going regulatory updates, legislative initiatives, construction industry trends and information through its publications and meeting agendas. For more information, go to www.agcmass.org and click on the date.
