27th annual Build Boston to feature Learning Stage and Design Gallery: November 16-18 at the Seaport Trade Center

November 10, 2011 - Spotlights

Build Boston is proud to present the 27th edition of its annual tradeshow and conference at the Seaport World Trade Center. The show attracts more than 250 of the nation's leading suppliers of building technologies, products and services, and more than 16,000 registrants. As the largest regional event for the design and construction industry in the country, Build Boston takes its role as convener and innovator seriously. To that end, the conference program has evolved, organizing in distinct tracks that are timely, technically advanced and relevant across the A/E/C professions. New products, technology innovations and the debut of unique services for the building industry are waiting for your inspection. Whether you are a contractor, engineer, specifier, or architect, you will find what you need (and even what you didn't know you needed) at Build Boston. Dig in and enjoy.

Exhibit Hall Highlights

Innovation Pavilion

The Innovation Pavilion provides a venue for new and innovative products to join the established event. Products showcased here have been in the marketplace for less than three years!

Housing Charrette

Wednesday 8:00 am- Noon

Housing is a perennial challenge for Boston area communities – here's your chance to weigh in on that conversation. Join Enterprise Community Partners, the BSA Housing Committee and other stakeholders for a morning of collaborative visioning and design addressing housing needs in our region. For details and to register, go to buildboston.com

Learning State

Industry experts deliver a dozen riveting 30-minute presentations at no cost in the exhibit hall. Learning units are not available.

See presentations by these companies and more:

- New England Architectural Woodwork Institute
