New England Mechanical Contractors Association forms partnership with ZamRay.com

November 23, 2011 - Green Buildings

New England Mechanical Contractors Association (New England MCA) has made a partnership with ZamRay.com. The inherently green solution from ZamRay is ideal because it keeps excess inventory out of the landfills and in proper use situations.

ZamRay launched in January 2011 and has quickly grown into one of the nation's fastest growing construction resource with nearly 30,000 postings, 100,000 visitors and over a million page views. New England MCA's members will now have the ability to access 100% of the ZamRay site as part of their member benefits.

"New England MCA is a key partner for ZamRay," said Kurt Fisher, managing partner for ZamRay. "They are extremely progressive in the construction industry and are at the forefront of technology and green building. They represent the ideal client for ZamRay."

"New England MCA is very excited to provide their members with another benefit. Our partnership with ZamRay will allow our contractors to make better use of surplus stock items. This partnership mirrors New England MCA's belief in the reuse of worthy construction supplies and materials with a goal towards a more sustainable industry and a healthier environment."

The New England Mechanical Contractors Association represents the premier commercial and industrial heating, ventilation, air conditioning, and process piping contractors in Mass., Maine, N.H., R.I. and Vermont. For more than 100 years, the New England MCA has supported its contractors by providing resources such as workshops, seminars, conferences, government relations, labor relations, and marketing campaigns. Visit www.nemca.org for more information.
