Warrenstreet Architects and Milestone Engineering's South Cove Recreation Center project honored by USGBC-NH

December 22, 2011 - Green Buildings

Warrenstreet Architects and Milestone Engineering & Construction said that the South Cove Recreation Center has received the 2011 LEED Sustainable Building of the Year Award by the U.S. Green Building Council (USGBC) N.H. Chapter. This was the first year the USGBC-NH Chapter recognized LEED certified buildings in N.H. completed between 2009 and 2011. The Jordan Institute was the LEED Consultant for the project.

The South Cove Recreation Center is a 16,152 s/f community building located in the Eastman Community Association. It provides the community with a place to hold all recreation programs, houses a 25 yard three lane pool, 4 gathering rooms, a fitness/exercise room and youth center for the children who live in the association. The residents of Eastman had high standards of sustainability and we worked closely with them to achieve those standards.
