Helfrich joins SAK Environmental as environmental engineer

January 05, 2012 - Front Section

SAK Environmental, LLC, a leading environmental consulting and engineering firm specializing in providing sustainable solutions to pollution issues, hazmat spills and environmental management has added recent Merrimack College graduate, Vincent Helfrich III to its team as an environmental engineer.

Helfrich earned an Accredited Board of Engineering and Technology (ABET) civil engineering degree, with upper level electives in environmental hydrology.

"Working for SAK Environmental is a wonderful experience, I have learned a lot in the short time I have been here. I was very lucky to get a job right out of college and SAK Environmental has taught me how to apply what I learned in the classroom to real life events. What I like most about working for an environmental company is playing a small, but important part in making our environment a cleaner and safer place to live for future generations."
