E.S. Bolous Co. awarded electrical contract for Bangor Arena and Conference Center by Cianbro Construction

February 02, 2012 - Northern New England

General contractor Cianbro Construction Management has awarded E.S. Boulos Company (ESB) the comprehensive electrical construction of the new Bangor Arena and Conference Center project. The project architect for the 202,257 s/f 8,500-seat event and civic center is Sink Combs Dethlefs of Chicago. Construction is underway as ESB is providing grounding and under slab conduit installations. The ESB scope includes primary and secondary power installations and low voltage installations - voice/data, fire alarm, CCTV, access and security, and A/V systems. The majority of the scope will begin in spring 2012, after steel erection and concrete placements, with completion scheduled for Sept. 2013.

ESB senior project manager Tom Nason will provide project management, supported by project engineer Peter Lamb. General foreman Andy Leali will supervise a crew of 15-2- electricians from IBEW Local 1253 in Augusta at peak construction. The facility will replace the existing Bangor Auditorium.
