Vincent to manage Nobis Engineering's new Vermont office

May 03, 2012 - Northern New England

Nobis Engineering, Inc. has opened an office at 179 Mine Rd.

The Vermont office will be managed by Brian Vincent, P.E., a senior project manager with more than twenty years of experience in both civil and environmental engineering projects including roadway and stormwater management, site development, landfill closures, and residential and commercial subdivisions. This office is being opened to support our Upper Valley and Vermont work including remediation services at: the Elizabeth Mine Superfund Site in South Strafford; Brownfields Assessment and Reuse Planning Consulting Services for Two Rivers-Ottawaquechee Regional Commission; and geotechnical and environmental services for the Brattleboro I-91 Design-Build Bridges. Nobis is a Disadvantaged Business Enterprise (DBE) in Vermont and most New England states.

"Nobis has been providing consulting engineering services to our clients for 23 years and this was the next natural step to better respond to our geographically expanding client base," said Ken Koornneef, P.E., president of Nobis Engineering.
