North Branch Construction recognized at ABC VT/NH Safety Awards ceremony

October 18, 2012 - Construction Design & Engineering

North Branch Construction, Inc. received multiple honors from the Associated Builders and Contractors of VT/NH Safety Awards. North Branch received first place in the 'Over 50,000 Man-Hours' category, as well as a Silver Level 'Safety Training and Evaluation Process (STEP)' award. The construction firm also received an award for 'Zero Cases Resulting in Lost Workdays' in the 'Over 50,000 Man-Hours' category.

North Branch has worked hard to raise the bar in their dedication to safety responsibility in order to continue to provide their clients with the best service by maintaining the highest standards possible. The company has gone a step beyond the recommended OSHA 10 hour training and obtained OSHA 30 hour construction training certification for all project managers and superintendents - an accomplishment few construction management firms can claim. Additionally, they have implemented safety requirements on their jobsites including the use of brightly colored safety shirts and vests to be worn at all times by all North Branch construction personnel.

North Branch also implements a Safety Fine Program on all of their projects with the intent to increase hazard recognition, reduce risk of injury, and create an overall safer working environment for all personnel working on North Branch construction sites. It requires subcontractors as well as North Branch's own employees to abide by the OSHA Construction Industry Regulations at all times. When safety violations are observed, it is North Branch's objective to correct them immediately. Consequently, North Branch issues safety fines for any repeat violations.

At the end of each year, North Branch donates all proceeds from the Safety Fine Program to the non-profit charities and organizations that they work with.
