02-12-2013 - EBC-NH Chapter Water Program

January 24, 2013 - Green Buildings

EBC New Hampshire Chapter Water Program: New Hampshire's Water & Wastewater Infrastructure Trends February 12 - 7:30 AM - 12:00PM Municipal water, wastewater and stormwater systems are faced with the daunting task of operating aging infrastructure in tough economic times. This, coupled with increasingly stringent regulations and emerging issues, such as new contaminant concerns, make planning for and building sustainable infrastructure even more challenging. This event will provide an overview of the issues and provide case studies from system managers, regulators and consultants. The event will also highlight a presentation from John Gilbert, recent Chair of the just completed Water Sustainability Commission. He will present the findings and recommendations from their 2012 Report, "New Hampshire Lives on Water."
