Metro Walls installs steel framing, metal trusses, interior framing and drywall for Villages at River Mead

March 15, 2013 - Construction Design & Engineering

Metro Walls has been hired by Cutler Associates to complete a large scope of work at The Villages at River Mead.

River Mead is an assisted and independent living community that is adding a new 108,000 s/f building within 33 wooded acres across from the original campus, near the downtown area. The apartment and cottage styles will be open concept, and planned for living and entertaining.

Metro Walls is performing the installation of all light gage steel framing, light gauge metal trusses, wood blocking, interior framing, and all drywall.

The sister company Exterior Designs, was also hired on the project to complete all of the exterior siding and trim. The project is expected to be completed this spring.
