Pro Con on schedule for July completion of 128 room hotel Residence Inn by Marriott Hotel

April 18, 2013 - Construction Design & Engineering

Construction is continuing on schedule for the new 128-room Residence Inn by Marriott hotel, located at the intersection of First Ave. and B St. in the New England Business Center office park. The hotel, which is being developed by Waterford Development Corp., is part of a redevelopment plan by Normandy Real Estate Partners that includes four new office buildings, the hotel and two parking garages to be built in the business park over the next few years. Pro Con Inc is the architect and construction manager for the \$13.5 million design build hospitality project, which is owned by SXC Needham Inn, LLC.

"The roof is complete and the windows have been installed, making the building weather tight," said the project manager for XSS Hotels LLC.

Pro Con Inc has designed the Needham Residence Inn to achieve LEED certification. The hotel is being built using regional and recycled materials in construction and is incorporating environmentally friendly design elements such as a white roof, over-sized windows, low-flow, water-efficient plumbing fixtures and LED lighting throughout the development.

The 89,740 s/f Residence Inn, which is designed for the extended stay traveler, will offer complimentary continental breakfast, evening social hours and each suite will have separate working, lounging, and sleeping areas. Each room will also have a fully equipped kitchen with granite counter tops, microwave, stove, refrigerator, dishwasher and coffee maker.

The building's first floor will house the hotel's lobby and reception, common areas and conference rooms. Floors 2 thru 5 will house the hotel's guest rooms. The hotel will offer 116 urban studios, 8 one-bedroom suites, and 4 two-bedroom suites, with a large hearth room, bar and lounge area, breakfast room, indoor pool and fitness room, two flexible space meeting rooms, business center and guest laundry area. Plans call for the hotel to have covered parking for 22 vehicles and surface parking for 80 vehicles. The hotel, which is conveniently located off of Rte. 128, will serve both business and leisure travelers.

The exterior design will feature precast concrete blocks, brick veneer, insulated metal paneling and cornice molding. The hotel's main entrance will feature a canopy with metal panels and double sliding glass doors. Construction on the site began in August 2012. The hotel is scheduled to be completed in July and plans to open in August.
