North Branch Construction completes Sig Sauer test facility - plant upgrades ongoing

May 16, 2013 - Construction Design & Engineering

North Branch Construction has completed construction of a testing facility for Sig Sauer. This two-level, 12,000 s/f facility was constructed within its existing manufacturing building in Newington. The facility will be used to function-test new production.

North Branch continues upgrades to Sig Sauer's manufacturing plant in the same building. This work includes various mechanical, electrical, plumbing, and fire protection system upgrades as well as construction of an in-plant inspection office and the installation of warehouse racking and mezzanine systems.

Design for the new test facility is by Nutec Group.
