Join EBC for exciting summer program and events

June 27, 2013 - Green Buildings

The Environmental Business Council of New England will be holding two interesting upcoming programs this July. Please see below for more information about upcoming events at the EBC and visit the EBC's website at www.ebcne.org.

EBC Northern New England Dam Management Program: Small Dam Repair, Rehabilitation or Removal

July 11: 7:30 AM - 12:00PM

Broad public interest in the future of small dams in northern New England provides an opportunity to explore alternatives for dealing with small dams, implications of removal versus rehabilitation, and the costs/benefits of choosing the best path forward. Removal or modification of small dams for aquatic habitat restoration; extreme weather events and their impacts on existing small dams; and the potential for new hydropower development at existing dams to support local renewable energy infrastructure are all potentially viable options to consider for a dam's future. This EBC program will summarize the dam-related regulatory frameworks in the three states, provide an overview of the current permitting requirements for dam repair and removal, discuss lessons learned from case studies, and provide an open discussion on community issues, partnerships and funding for these types of projects.

EBC 19th Annual Summer Garden Party

July 18: 5:00 PM - 9:00PM

As a co-host EBC will promote your organization through placement of your logo on the EBC website and in event email communication. Members of your organization will receive the EBC Member discount to attend. A co-host must be able to market the event to their member or contact list.
