Callahan provides services for Cavium Network's data center; design for 53,000 s/f by Margulies Perruzzi Architects

July 19, 2013 - Construction Design & Engineering

Callahan, Inc. is nearing completion of the relocation and expansion of Cavium Network. Callahan has provided preconstruction services for the 53,000 s/f project.

Cavium will be moving from 100 Nickerson Rd. within the business park into a larger space located at 600 Nickerson Rd.

"The new location will allow Cavium to expand further in the future," said Stephen Callahan Jr., project executive at Callahan.

Cavium's data center will be supported by a 250 kilowatt (kw) generator with an 80 kw UPS (un-interruptible power supply) system. Sensitive humidity requirements for the (electronics) lab have been incorporated into the HVAC & architectural design.

"We have worked closely with the brokers representing the tenant and the landlord throughout the site selection process and lease negotiation," Callahan said.

The company has been contracted for construction management as well as MEP/FP (mechanical, electrical, plumbing, & fire protection) design/build services.

Margulies Perruzzi Architects is the architect for the project.

The project is expected to be completed next month.
