DiPrete Engineering welcomes Babcock as its new Survey Department manager

September 26, 2014 - Front Section

DiPrete Engineering recently welcomed Robert Babcock as its new Survey Department manager. Babcock, a registered land surveyor in both R.I. and Mass., has 28 years of land surveying experience throughout New England and brings a variety of skills to DiPrete's team.

"Robert's broad range of technical, engineering design, field, and presentation skills is a huge asset to our company," said Hemant Ajbani, COO at DiPrete Engineering. "His depth of knowledge and management experience will be an outstanding resource for our team and clients."

Babcock is eager to enhance DiPrete Engineering's processes and technology offerings. "My overall goal is to provide every client with a quality survey that meets the scope and budget of each project," said Babcock. "Going forward, we will look to combine more advanced technologies such as 3D laser-scanning and drone surveying tools with DiPrete's solid surveying process to produce comprehensive surveys for our clients."

Before joining DiPrete, Babcock worked as a field surveyor for Land Use Specialists, John Risser Associates, and Mark Hutchins Associates. He also served as survey manager for 16 years with Dunn McKenzie, Inc., located in Norfolk, Mass. His interests include U.S. and world history and he enjoys golfing, skiing and gardening on his free time.

DiPrete Engineering hired Babcock in place of Peter Wagenaar, the firm's preceding survey department manager, who is returning to his family in Minnesota.

DiPrete Engineering is a leading civil engineering, planning and surveying firm in New England. The firm has offices in Providence, Newport, RI, and Boston.
