Sanborn Head celebrates Boston Landing Station ground breaking, working with NB Development Group

June 18, 2015 - Construction Design & Engineering

Sanborn, Head & Associates, Inc.'s (Sanborn Head) Stan Sadkowski took part in the May 12 groundbreaking ceremony for the Boston Landing Station. Sanborn Head is working with NB Development Group to provide geotechnical engineering, environmental engineering, Massachusetts Contingency Plan (MCP) compliance services, and construction administration services for the Boston Landing development.

Boston Landing Station will provide a vital mass transit component to Allston/Brighton. This station is part of a much larger Boston Landing development project, revitalizing the former stockyard area of Brighton that will also include the future New Balance headquarters.
