DiBona named senior mechanical engineer at Consulting Engineering Services

August 20, 2015 - Construction Design & Engineering

Consulting Engineering Services (CES) has named Tony DiBona as senior mechanical engineer. He will be reporting to Nick Fair, associate branch manager.

DiBona started his career installing piping and ductwork which is how he developed an interest in drafting and design. He studied HVAC design and Engineering from Northeastern University and The Franklin Institute.

Of the many projects DiBona has worked on, he recalls the design of four palaces for the Saudi Royal family and a homeless shelter for Vietnam Era war veterans as the most memorable.

Aside from his love of engineering, Mr. DiBona also enjoys vintage cars, woodworking construction and outdoor landscaping. He has two spirited daughters and has been married to his wife for 39 years; he states this as his biggest accomplishment. He and his family reside in Foxboro, Mass. and enjoy vacationing in Florida.

"Every single person that I have met in this company is of the highest character and all have been a pleasure to work with. I am happy and grateful to be with CES," said Mr. DiBona.

Consulting Engineering Services is a 85 person firm that specializes in mechanical, electrical, fire protection and plumbing engineering services for analysis, design, and construction administration. We also offer services such as technology and security design, communications solutions and systems commissioning. As a leader in sustainable building systems design, we have 14 LEED AP's on staff and all of our design professionals focus on implementing energy saving designs on each of our residential and commercial projects.
