09-22-2015 - EnerNOC will host Global Real Estate Sustainability Benchmark networking event

September 03, 2015 - Owners Developers & Managers

EnerNOC will host Global Real Estate Sustainability Benchmark networking event on September 22 at EnerNOC headquarters, One Marina Park Dr., - 5th floor Caf  . The Global Real Estate Sustainability Benchmark (GRESB) is a dynamic benchmark used by institutional investors to assess the sustainability performance of real estate portfolios around the globe. Completing the survey takes some effort, but with each passing year, the GRESB benchmark is becoming increasingly essential work for any Real Estate Investment Trust (REIT) that wants to be seriously considered by investors. Join fellow commercial real estate (CRE) peers and energy efficiency experts for an evening of networking at EnerNOC's headquarters on the Boston waterfront, and hear how top REITs are utilizing GRESB data results to make smarter energy decisions across their portfolios. Opening remarks will be given by Fielder Hiss, vice president of marketing and product management, EnerNOC; and results presentation by Dan Winters, head of north america, GRESB. EnerNOC is a leading provider of cloud-based energy intelligence software (EIS) and services to thousands of enterprise customers and utilities globally. EnerNOC's EIS solutions for enterprise customers improve energy productivity by optimizing how they buy, how much they use, and when they use energy.

EIS for enterprise includes budgeting and procurement, utility bill management, facility optimization, visibility and reporting, project tracking, demand management, and demand response. EnerNOC's EIS solutions for utilities help maximize customer engagement and the value of demand-side resources, including demand response and energy efficiency. EnerNOC supports customer success with its world-class professional services team and a Network Operations Center (NOC) staffed 24x7x365.
