Patriquin Architects to complete 4,500 s/f renovation and fit-out

July 21, 2017 - Connecticut

Patriquin Architects continues construction on new Esana MedSpa location - Guilford, CT

Guilford, CT A former furniture retail store is the new home of Esana MedSpa and Plastic Surgery Center. The building is made up of a historic house and a large barn-like addition from the 1990s. Patriquin Architects has designed modern medical offices, patient and staff areas in the existing spaces of this building, while keeping the exposed beams of the historic house and highlighted the trusses in the addition.

Originally built in 1797 per town records, the structure was renovated, extended, and a large 2-story wood barn was attached.

Esana will be opening their new location this fall.

The 4,500 s/f renovation highlights the interior structure of the new and old, featuring exposed timber framing, large wood beams and exposed trusses, and roof framing.

Esana wished to preserve the existing interior, but also needed to provide a high degree of the acoustic and visual privacy required for any medical office.

Patriquin Architects is a team of architects and designers based in New Haven. The office has a broad range of experience in a variety of institutional, commercial and residential projects.
