BOND to build Stonehill College's \$30m Meehan School of Business

September 15, 2017 - Construction Design & Engineering

Leo Meehan School of Business, Stonehill College - Easton, Mass.

Easton, MA Stonehill College has selected BOND to provide preconstruction and construction management services for its new Leo Meehan School of Business. This project was awarded to BOND and is being managed by the Providence office team.

The \$30 million School of Business launches the College's revitalization program to transform the campus for the future. Located in the main quadrangle of the campus, the 65,000 s/f facility will provide an innovative and active learning space for students in accounting, finance, international business, management, marketing, economics and healthcare administration. It will feature cutting-edge technology and flexible, adaptive classrooms that support hands-on learning and collaboration, preparing students to operate more successfully in the real world.

"We are pleased to continue our relationship with Stonehill College with the newly established School of Business project," said Dan Ramos, BOND's regional manager, Providence. "We look forward to working closely with the College to deliver upon this exciting new transformation of the campus, which will elevate the College regionally and nationally."

Currently in the design phase, building construction will begin spring 2018 and is slated for completion in August 2019. Design and project partners include: S/L/A/M Collaborative, Bard, Rao + Athanas Consulting Engineers (BR+A) and Nitsch Engineering.

In addition, BOND recently broke ground on the Stonehill's Academic and Welcome Center and has completed several other projects on campus including: the Rev. Mark Cregan C.S.C. Athletic and Fitness Center at the Sally Blair Ames Sports Complex and the Thomas and Mary Shields Science Center.
