Windover Construction completes work at Wellspring House Education Center

October 06, 2017 - Owners Developers & Managers

Gloucester, MA Windover Construction completed a classroom renovation and reconfiguration project at the Wellspring House Education Center.

The space was transformed from one large classroom into a multi-room suite including foyer, computer lab, conference room, galley kitchen and working office space, complete with a separate entrance at Wellspring's Veronese Community Education Center, home to their adult learning initiative (ALI). The center now offers the ability for students to attend class, use computers for job searches and resume preparation, and receive career and educational counseling, initiatives central to Wellspring's mission of assisting families with homelessness prevention and shelter.

"Wellspring approached our team for guidance based on our longstanding relationship with the organization," said Windover CEO and President Lee Dellicker. "They had a need to update their space to better support their programming, but did not quite know where to start. We established early concepts and estimates for the space to ensure that we could achieve their vision while maintaining careful stewardship of their available funding. This effort is a testament to how many hands coming together can make such a big impact for an important community organization."

Windover worked closely with Ebben Creek, an architectural firm out of Essex, Mass., to fine-tune the project design. As part of the preconstruction planning, Windover also led grassroots outreach to local trade partners who could help execute the design plan through donated time, supplies, or professional services provided at cost. Windover managed the fast-track renovation and guided the process to meet Wellspring's objectives on all fronts - from scheduling and budgeting to programming.

What is more, a crew of Windover volunteers rolled up their sleeves to help out with a variety of assignments, such as painting, cleaning, and installing a kitchenette, to put the finishing touches on the project.

"We are thrilled with the new space and thankful to Windover Construction for their fine work," said Julie Bishop, chair of the Wellspring House Board of Trustees. "The renovation beautifully meets Wellspring's expanded programming needs providing small meeting spaces for students and teachers and for those working with the WERC program."

Windover would like to acknowledge project partners including Roy Spittle Associates, JP Campbell,

Paglia Plastering, Kaloutas Painting, Messina's Flooring, Timberline Enterprises, and Lee Pasture Farm.

Windover creates sophisticated custom homes, state of the art commercial and institutional spaces and urban multi-family communities, all executed with a passion for attention to detail. The winner of numerous industry awards, Windover's skilled team of professionals possesses a deep understanding of the construction process and collaborates with clients to provide an exceptional experience from inception of their project to completion. The firm is headquartered in Beverly, Mass., and works with clients throughout New England.
