## **Stabile introduces new services for comm'l. and residential clients**

July 02, 2008 - Northern New England

Stabile Construction Services introduces the addition of earthwork/excavation, custom home building and remodeling services to its offerings for commercial and residential clients. Previously, Stabile Construction Services focused primarily on commercial construction projects, while Stabile Homes, Inc. developed and built new home communities throughout N.H. and northern Mass.

"We're not new to earthwork, custom home building or remodeling. We've been providing these services for three decades on our own projects or on an ad hoc basis. What is new is that now we are marketing and offering these capabilities as part of a broad menu of services so clients can use Stabile to do as much, or as little, as they need," said John Stabile, founder of The Stabile Cos.

Now homeowners can live in a Stabile community, contract with Stabile to build a custom home, or hire Stabile for smaller jobs. Similarly, commercial clients can hire Stabile to build a new building, fit-up existing space, or take on any site-related job, from land clearing and excavation through hydroseeding and landscaping.
