Diversified Project Mgmt. oversees construction of TRUMPF's 83,000 s/f research and mfg. facility

July 02, 2008 - Connecticut

Diversified Project Management, Inc., one of New England's premier owners' representative firms providing programming, project management, construction administration, furniture coordination and move-planning services, has completed project management services for TRUMPF's new 83,000 s/f Laser Innovation & Technical Excellence (LITE) Building, a new research and manufacturing facility. TRUMPF is one of the world's largest producers of fabricating machinery and a world market leader in lasers used for industrial production technology.

The new facility, which will be used to further develop new lasers, expand TRUMPF's production of laser resonators and maintain the company's leadership in state of the art laser technology, was completed at a cost of more than \$20 million.

The new building features research labs, a 55,200 s/f production hall and a 6,000 s/f class 10,000 cleanroom designed for the manufacturing and testing of CO2 and solid-state laser resonators. DPM was retained by TRUMPF to manage the construction of the new research and manufacturing facility which will be staffed by approximately 120 employees.
