Beaumont Solar named to list of largest clean energy cos. in Mass.

January 05, 2018 - Green Buildings

New Bedford, MA Beaumont Solar, a leading, full-service solar developer and engineering, procurement & construction (EPC) company, has been named to Boston Business Journal's (BBJ) annual list of the largest clean energy companies in Massachusetts for the second consecutive year. Beaumont Solar secured the 10th position among the top 25 leading companies in the state.

"Since first making the list in 2016, the company has continued to experience explosive growth not only in megawatts, but in job creation as well," said Phillip Cavallo, president and CEO of Beaumont Solar. "Since submitting the information to the BBJ we have increased our total headcount to over 100, which now would project the company into the 8th position on the list. Earlier this year the company announced the official launch of the 'Big C' Services division, offering construction services between developers, project owners and Beaumont Solar. The success of this division and demand for its services has exceeded all expectations and proven to be a real growth machine for the company. The company has achieved a low cost, high quality construction model that is scalable and recognized as a significant competitive advantage by our trusted partners."

Beaumont Solar has been previously recognized for their expertise in quality and design by many prestigious solar industry resources throughout the years. Solar Power World, a leading online and print resource for news and information regarding solar installation, development and technology, recognized Beaumont as one of the top solar contractors nationwide. Most recently, Solar Industry Magazine feature one of Beaumont Solar's more innovative installations on a saw-tooth mill roof in the cover story of their May, 2017 edition. Beaumont has also been recognized as commercial dealer of the year by SunPower, one of the world's most innovative energy companies.

With over 50MW deployed, Beaumont Solar continues to thrive through the vertically integrated, self-performing, scalable business model that offers the full design and construction package for any project from start to finish. By aligning the company's in-house design and engineering department, financing and construction management staff, with direct employment agreements with local IBEW members, Beaumont Solar has differentiated itself as a fully-aligned, industry leading EPC delivering unmatched efficiencies in quality, craftsmanship and value that project developers and system owners demand.

Beaumont Solar is a leading, full-service solar developer and Engineering, Procurement & Construction (EPC) company. They specialize in the development, design, building and long-term operation & maintenance (O&M) of solar systems in the commercial & industrial (C&I), utility,

agriculture and public sectors. With a long history dating back to 1918, they have the experience, infrastructure and expertise to help maximize the value of underutilized assets (rooftop, carport, landfills, hazmat sites, and land). They help structure financing; both debt and tax equity, provide off-taker power agreements and ground or rooftop leases and determine site feasibility. Beaumont works closely with customers to help them meet financial, energy and sustainability goals by identifying the most efficient systems and cost effective financing. With offices in MA, RI, and NJ, they provide installation and support across the USA.
