Integrated Builders completes 133,500 s/f two-phase project

July 11, 2008 - Spotlights

Integrated Builders has completed a two-phase, 133,500 s/f interior construction project at the worldwide corporate headquarters of Aspect Software, one of the world's largest companies solely focused on Unified Communications for the Contact Center.

"This was an exciting challenge for our team as phased construction requires a well-thought out blueprint, one that has minimal impact on the daily operations of the company," said Jay Dacey, president of Integrated Builders. "We are proud with the results and believe that the strategic objectives of Aspect Software can now be fully realized given its newly enhanced space."
