Why the A/E/C Industry? I started off in architecture, graduating with a bachelors of science in Architecture. While I loved designing, I realized I liked being able to make a design come to life much more!

Advice/Keys to Success: Always continue to learn and ask questions, even the ones you think are stupid.

What was your most notable project in 2017? At the age of 26, I helped win and then run my first large size project (24,000 s/f), that was to be completed in 6 months. The project was a lab/office interior fit-out that cost around \$8 million.
