North Branch Construction donates Safety Fine Program proceeds

April 06, 2018 - Northern New England

Colby-Sawyer College Center for Art + Design - New London, NH

New London, NH North Branch Construction's dedication to jobsite safety includes the implementation of the North Branch Construction Safety Fine Program on all of their projects. This program was developed in 2005 with the intent to increase hazard recognition, reduce risk of injury, and create an overall safer working environment for all personnel working on North Branch Construction jobsites. At a minimum, it requires subcontractors, as well as North Branch Construction's own employees, to abide by the OSHA construction industry regulations at all times. When safety violations are observed, it is North Branch Construction's objective to correct them immediately. Consequently, the firm warrants safety fines for any repeat violations.

North Branch Construction continues to raise the bar for construction jobsite safety, in addition to the safety fine program, by performing random jobsite inspections and obtaining OSHA 30-Hour Certification for all of their project managers and project superintendents. This diligence has led to North Branch Construction once again obtaining the lowest EMR of all 38 members of the Workers' Compensation Self-Assurance Group, with which the firm is affiliated. North Branch Construction also reported no lost time injuries for 2017.

At the end of each year, North Branch Construction donates all proceeds from the North Branch Construction Safety Fine Program to the non-profit charities and organizations that they work with. This year, the firm donated the proceeds to Colby-Sawyer College. North Branch Construction recently completed construction of the new Center for Art + Design on the Colby-Sawyer campus.
