BOND and SLAM break ground on Stonehill College's Leo Meehan School of Business

June 15, 2018 - Construction Design & Engineering

Shown (from left) are: Dan Dwan, Robert Wilson, Frank Hayes, Robert Didonato, Dan Ramos, Andrew Abderrazzaq, Leo Meehan, Deborah Salvucci (dean of Meehan School of Business, Stonehill) Robert Murray, Father John Denning (president, Stonehill) and Stephen Piligian.

North Easton, MA Stonehill College celebrated the groundbreaking of the new Leo Meehan School of Business, designed by The S/L/A/M Collaborative (SLAM) and constructed by BOND. The ceremony was attended by members of the College, academic administrators, trustees, students, faculty and the project team.

The new \$30 million Meehan School of Business will offer 65,000 s/f of cutting-edge technology, adaptive classrooms and collaboration spaces. The building's Georgian architecture is designed to reflect the true spirit of the Stonehill community and campus, while the interior is designed to encourage innovation and advanced business environments. Completed by fall 2019, it features innovative Bloomberg rooms, simulated trading rooms and advanced business innovation studios with maker spaces. The school will expand the curriculum and encompass the accounting, finance, international business, management, marketing, economics and healthcare administration programs.

“BOND is proud to be part of this exciting project on Stonehill's campus, continuing our long-standing relationship with the College,” said Dan Ramos, BOND's Regional Manager, Providence, Rhode Island. “The new Business School will transform the student experience and support the school's exceptional program for business education. We are pleased to celebrate this next project milestone that will energize the heart of the Stonehill Campus.”

“Stonehill College is experiencing an amazing transformation period and SLAM is proud to preserve and celebrate the architectural story on campus, complemented by interior spaces that support today's innovative and collaborative learning styles,” says Neil Martin, AIA, SLAM Design Principal. “We are thrilled that construction has begun on this exciting new building and look forward to the ways it will enrich faculty and student life for the Stonehill community.”

BOND and SLAM are also working together on the College's Academic and Welcome Center, which will be completed by the fall 2018 school year. Other past partnership projects on campus include the Thomas and Mary Shields Science Center. BOND also provided construction management services for the Rev. Mark T. Cregan C.S.C. Athletic and Fitness Center at the Sally Blair Ames Sports Complex. SLAM also designed the latest Campus Master Plan, the new Residence Hall and Campus Foot Bridge.
