Abbot Building Restoration Company, Inc. provides a broad range of masonry construction services

August 31, 2018 - Spotlights

Boston, MA Abbot Building Restoration Company, Inc. was founded in 1936, incorporated in 1963, and currently employs a number of building technology and construction specialists with Michael Norman as president. The firm is DCAM Certified with the Commonwealth of Massachusetts, licensed, and insured. All craftsmen are directly employed by the company and are OSHA certified.

Having recently transitioned to a fourth generation, their family-oriented management team can provide the knowledge, insight, and expertise their customers demand and deserve.

Abbot Building Restoration

Capabilities

Abbot provides a broad range of masonry construction services to public, institutional, and commercial clients, including condominiums, property management entities, and private residences. The firm also acts as a general contractor for a variety of masonry building construction projects.

No matter the size of the building, Abbot is dedicated to providing solutions to building deficiency problems related to climate conditions (freeze/thaw cycles) and other weather exposure issues, sealant failures, and normal “wear and tear” deficiencies that must be addressed to properly maintain an aging structure.

Their Commitment

Abbot is committed to providing effective single source solutions, quality workmanship, the utmost safety, and devoted customer service on each and every project. They assist their customers in understanding the existing conditions that should be addressed before these issues become larger, more complex problems.

Toward that end, they develop preventive maintenance plans to meet the specific need of each customer based on specific property conditions and cost considerations. These plans provide building owners and property managers with a road map to prioritize, budget, and perform required

maintenance pro-actively.

Small Projects Division

- Specializes in structures ranging from 1-3 stories to buildings up to 60 feet high.
- Service areas: condominiums, apartments, small office buildings, private residences.
- Works primarily with building owners, condominium associations, property managers.

Large Projects Division

- Specializes in structures higher than 60 feet.
- Service areas: commercial, industrial, and institutional buildings.
- Works primarily with building owners and condominium associations, management companies, consultants, architects/engineers.

Design/Build Services

Abbots design/build expertise allows them to collaborate with building owners, property managers, and architects/engineers toward a functional, cost effective, and well-executed project. The closed loop capability enables their project team to propose value-engineering solutions to meet virtually any masonry requirement. Further, their efficient operations team allows them to “fast track” projects to meet tight production schedules.
