IBEW Local 96 crews provides electrical safety checks in Merrimack Valley in response to natural gas disaster

October 26, 2018 - Front Section

Andover, MA On September 24, 40 highly skilled IBEW Local 96 electricians joined with All-Pro Electric, of Haverhill, to provide electrical system safety checks and upgrades at homes in Lawrence, Andover and North Andover in the wake of the Merrimack Valley natural gas disaster. The inspections were being done in tandem with crews from IBEW Local 103 to ensure that electrical wiring in homes is able to support extra wattage required for space heaters. While Columbia Gas and National Grid crews are making repairs to the gas lines, the National Guard is distributing space heaters to homes that can support them so residents have heat in the cooler fall weather. The Local 96 electrical crews worked for three weeks supporting the effort and Local 103 is continuing its work until natural gas is restored to all homes in the region.
