DiPrete Engineering provides services for \$460,000 animal shelter

May 17, 2019 - Construction Design & Engineering

Seekonk Animal Shelter, 100 Peck Street - Seekonk, MA

Seekonk, MA Last fall, the town approved \$460,000 for the design and construction of a 2,500 s/f animal shelter at 100 Peck St., which will be adjacent to the current shelter and town hall. The new animal shelter also received \$300,000 for the project from Save-a-Pet.

The town has teamed up with Brewster Thornton Group Architects, Coletta Contracting Company, Inc., Odeh Engineers, Creative Environment Corp., and DiPrete Engineering to design and construct the new building.

The site will utilize an existing driveway along with tying in utilities to different locations on the site and along Peck St. A new parking area is being developed along with sidewalks and other hardscape around the building.

DiPrete Engineering is providing site design, including design of the drainage system and sewage disposal system as well as construction administration.

“We’re happy to work on a project that will help the Seekonk Animal Shelter,” said Jason Clough, senior project engineer/project manager at DiPrete. “The organization deserves a good home for the animals and an improved work environment so they can continue to fulfill its mission.”
