AliGo Mobile brings Invisalign consultations to offices in Boston

June 07, 2019 - Owners Developers & Managers

Boston, MA AliGo Mobile has launched a new service that uses a classic Airstream trailer to deliver beautiful smiles to consumers at their workplaces. AliGo Mobile visits local businesses and office parks to provide onsite Invisalign consultation, care and management, making it quick and convenient to access high-quality orthodontic care.

Sixty-five percent of all adults could benefit from orthodontic treatment. Orthodontics not only improve the appearance of smiles, but also help address bite issues, TMJ symptoms, and make teeth easier to clean, reducing potential cavities and gum disease. While more and more adults are addressing their smile concerns, carving out time for regular follow up office visits (usually every 6-8 weeks) can be problematic.

“AliGo Mobile provides a fantastic solution for busy professionals who want to straighten their teeth, but don’t have time to visit the orthodontist office during business hours,” said Dr. Sam Levine, founder of AliGo and owner of a Lexington-based practice. “We bring the orthodontist to you.”

The AliGo Mobile team provides complete Invisalign treatment and follow up care in its Airstream trailer (complete with waiting and exam rooms) parked in your office parking lot. Treatment includes a complimentary Invisalign consultation using an impressionless 3D scanner, bi-monthly monitoring of treatment progress, and complimentary tooth whitening given to patients with their retainers at the end of treatment. Aligners are hand-delivered to patients, and AliGo Mobile offers flexible payment options, including FSA and HSA. There is no cost to businesses that host AliGo Mobile, making the service an easy additional health and wellness benefit that they can offer to employees.

“So much of an employee’s time is spent at the workplace. Offering onsite health and wellness benefits can be an attractive employee benefit as employers compete for talent,” said Dr. Levine. “By partnering with AliGo Mobile, businesses can give their employees easy access to scheduling appointments with a certified orthodontist, saving them time and money.”

“Working with AliGo Mobile has been simple, easy, and effective,” said Erin Tremblay, event specialist for Longfellow Real Estate Partners. “We are so thankful to be able to offer our tenants a convenient, high quality service that promotes well-being. We aim to make our tenants’ lives easier and more convenient, that way they can leave work and spend their free time doing the things they love.”
