Robitaille joins South Coast Improvement

March 20, 2020 - Construction Design & Engineering

Jacob Robitaille

Marion, MA South Coast Improvement Co. (SCI) hired Jacob Robitaille as its director of production. Robitaille comes to SCI after working in a project management role at Delbrook/JKS.

In his role as director of production, Robitaille works closely with project managers and superintendents to ensure South Coast Improvement projects run smoothly and meet or exceed client expectations.

“What impressed us most about Jake was the breadth of his 14 years of experience, particularly his time in Washington DC where he worked on multiple public and private projects, ranging in scope from \$1 million to \$1.5 billion,” said Tom Quinlan, president of SCI. “In the short time he has been with us, he has put that vast construction experience and his personal skill set to great use, providing exceptional guidance, support and leadership to our project teams and maintaining quality, schedule and client confidence.”

Robitaille earned his bachelor’s degree at Wentworth Institute of Technology. He also holds an OSHA 30 certification.

“I’m thrilled to be part of the South Coast Improvement team. I was very impressed with the atmosphere that Tom and Henry Quinlan have created here,” said Robitaille. “The company has experienced tremendous growth in recent years. I’m looking forward to putting my years of experience on larger projects to work and help the company continue that growth.”
