Erroneous billing practices cost businesses over \$250 billion a year

September 05, 2008 - Connecticut

Over 80% of all businesses are overcharged by their service providers, and they don't even know it! These overcharges are coming from telecom service providers, workers' comp insurance, utility services, leases from landlords, merchant credit card accounts, overnight shipping companies, property insurance, local property taxes and the IRS!

Every business owner has a bookkeeper, CPA or a department dedicated to paying the bills. They double check the math, but do they have the knowledge or time to determine if the business has the right service, classification, tax rate, program, etc? For example, do you or any of your employees really understand all of those charges on your telephone bill?

AmCorp Management is Americas' leading revenue recovery experts and has recovered over \$700 million for its clients. AmCorp utilizes the "best practices" that have been implemented and "time tested" by Fortune 500 Companies.

ROI Corporation recently signed an agency agreement with AmCorp Management to represent the company in the New England marketplace. ROI Corporation provides a free audit to business owners to help them recover lost revenue due to overcharges by their service providers and ROI only gets paid if a refund or credit is found. Clearly, this is a win-win scenario for all involved!
