ARC to design dining hall renovations/additions

September 07, 2007 - Northern New England

ARC/Architectural Resources Cambridge has been hired by Holderness School to design additions and renovations to Weld Dining Hall.

By increasing the capacity of the dining area, the renovated and expanded dining hall will accommodate 350 people for sit-down family-style meals and up to 475 for special functions. Improving the acoustics of the space will also create an atmosphere conducive to these family-style meals. The kitchen and servery will be redesigned to allow for better cooking capacity and smoother traffic flow at mealtimes. The project is scheduled for completion in the fall of 2008. Milestone Engineering and Construction will serve as the construction manager for the project. Ricca Newmark Design is the food service consultant.
