What trends will dominate your industry in the coming months? It is no secret that the life sciences industry has been on a steady upward trend for the last few years. I am constantly having discussions about whether it is sustainable, and the great news is that it seems like it is a trend that will continue. We are currently working on multiple conversions of office to lab to make more room for growing companies. It is very exciting to be able to help these firms by providing a space for them to conduct their work that will ultimately help make the world a better place.
