BOND receives Project Achievement Award for Fitchburg's City Hall Campus

October 29, 2021 - Front Section

Fitchburg, MA BOND Building Construction, Inc., a premier full-service construction management and general contracting firm, was named the recipient of the Construction Management Association of America (CMAA) New England Chapter Project Achievement Award for the major renovation project at the Fitchburg City Hall Campus. BOND Building received the award at the 2021 CMAA-NE

Mark H. Hasso Project Excellence Program luncheon at the Omni Parker House in Boston.

BOND Building completed construction of this \$20.3 million restoration in collaboration with Colliers Project Leaders, the owner's project manager, and design partner ICON Architecture. The major renovation of the historic city hall building is a key component of Fitchburg's ongoing downtown economic development that is aimed at revitalizing the local community.

"We're honored to be recognized by the CMAA for our work on the Fitchburg City Hall Campus," said Frank Hayes, president of BOND Building. "BOND Building would like to thank Mayor Stephen DiNatale, our building partners, and the community for their cooperation and dedication to this complex renovation."

In 2012, the building was declared unsafe for occupancy. Now, the exterior building has been fully restored to its original state with the interior renovated to accommodate 14 administrative departments, including the office of the mayor. An adjacent building that was formerly a bank, donated by Bank of America, has been converted into a legislative building and now houses the city council chambers. The renovation has transformed the building into a modern and efficient workplace for city administrators to better serve Fitchburg residents.

Originally built in 1853, Fitchburg City Hall is considered a local historic landmark and is also being recommended for listing on the National Register of Historical Places with the Massachusetts Historical Commission.

For over 114 years, BOND has managed many of the Northeast's most complex construction projects. Subsidiary BOND Building Construction, Inc. (BOND Building) operates as a construction manager for academic, district energy, public, healthcare and life sciences clients. BOND Building has completed noteworthy projects for clients such as Beth Israel Lahey Health, Boston Children's Hospital, Dana-Farber Cancer Institute, town of Wakefield, city of Quincy, Harvard, MIT, UMass. and State University systems, Boston College, Boston University, Brandeis University, Bryant University, and the College of the Holy Cross.
