2022 Women in Construction: Jean McQuestion, Senior Project Manager at BW Kennedy

March 25, 2022 - Spotlights

Jean McQuestion

What was your greatest professional achievement or most notable project in the last 12 months? The most notable project in the last twelve months is the ongoing construction of a multi-building bio-manufacturing campus where life-saving drugs and therapies will be developed. One of the new buildings is substantially complete with tenant fit-out targeted to begin in April. Structural steel erection is nearly complete for the second building in the queue. While the second building continues to progress, BW Kennedy will break ground for the third new building soon. Two additional buildings are also scheduled for this campus which will result in 700,000 s/f of bio-manufacturing space.
