JC&A hosts ribbon cutting for GCP Technologies

June 24, 2022 - Front Section

Wilmington, MA J. Calnan and Associates (JC&A) one of the largest merit shop construction managers in the Northeast, participated in the ribbon cutting for GCP Technologies.

GCP, a leading construction products technologies company, is dedicated to simplifying the complexities of construction worldwide and delivering value to its customers through high-performance products that pursue advancements in construction tech.

JC&A provided work on this project from preconstruction through delivery, ultimately converting an ACF laboratory into an Industrial Chemistry lab. Project highlights also include the installation of new environmental testing chambers, a complete reworking of the existing lab footprint and new finishes throughout. Through a collaboration with CiDesign and Avid Engineers, JC&A's team was able to deliver a 40,000 s/f global research and development center at 100 Research Dr.

"We are thrilled to partner with GCP on this project and provide such an expansive scope of work," said Chet Braun, JC&A's project executive on the project. "The JC&A team prides itself on our work in promoting the sciences, and GCP's work has been vital in bringing some of the most critical scientific developments into the 21st century, advancing strategies that streamline even the most complex of challenges."

The team also performed upgrades and commissioning to the pH neutralization systems, boiler plants and tepid water systems, installed over 20 fume hoods as well. All lab gasses were also reworked.
