Skanska awarded \$39m contract to design and reconstruct Maffa Way and Mystic Ave. bridges

May 19, 2023 - Construction Design & Engineering

Boston, MA Skanska has been awarded a contract by the Massachusetts Department of Transportation (MassDOT) to carry out the \$39 million design and reconstruction of the Maffa Way and Mystic Ave. Bridges located in Boston and Somerville. The project will improve transit across two of the most highly trafficked roadways in the region and provide a multi-modal link between the two cities.

The design-build project consists of replacing two steel stringers and concrete deck superstructures, rehabilitating the existing bridge substructures, and reconstructing and resurfacing approximately 1,800 feet along Maffa Way and Mystic Ave.

“The Maffa Way and Mystic Avenue Bridges are vital roadways within Massachusetts’s local and regional transportation network,” said Paul Pedini, senior VP for Skanska USA Civil’s New England region. “Not only will the planned improvements increase traffic capacity, but they will in tandem better accommodate pedestrians, cyclists, and transit commuters, enhancing the overall functionality of the bridges upon completion.”

The newly reconstructed Maffa Way Bridge will include a 10foot, twoway bike lane separated from traffic with a raised median, in addition to a sidewalk approximately 12-foot wide will be added on the south side of the bridge. The new Mystic Avenue bridge will also include a 12foot wide, shared-use path on the north side of the roadway for pedestrians and bicycles. Both bridges include dedicated bus lanes.

The project commenced in April 2023 and is expected to reach completion in December 2026.
