Skanska begins work on \$311 million project for Simmons University in Boston

June 23, 2023 - Construction Design & Engineering

Boston, MA Skanska has signed a contract to build Simmons University's new Living and Learning Center on their academic campus, located in the Longwood Medical area of the city. The contract is worth \$311 million.

This project is the final phase of "One Simmons," which consolidates all of the university facilities onto one campus. This project is a decades-long strategic master plan designed to support the Simmons mission as one of the only remaining women's centered universities in the country.

The 398,264 s/f Living and Learning Center will include a student dormitory with over 1,000 student beds, meeting, and social spaces along with office support spaces and a 500-seat dining facility. In addition, an athletics and fitness facility will include a pool, gymnasium, rowing tanks and weight room. The building will also accommodate an existing central electrical plant and emergency generator, which serve the academic buildings on the existing campus.

Work began on the Living and Learning Center in May and is slated for completion in September 2026. After Simmons takes occupancy of their new Living and Learning Center, Skanska will begin development for Longwood Place.
