ReyCon completes library and cafeteria renovation at Lexington Christian Academy

September 22, 2023 - Construction Design & Engineering

Lexington, MA ReyCon has completed work on the renovation of the cafeteria and library at Lexington Christian Academy (LCA), in partnership with Burlington-based CSL Consulting and Annum Architects.

LCA engaged the ReyCon team to help modernize the library and cafe layout into a more open and collaborative area for students. The strategy and vision involved changes to the service line, kitchen and egress into the library from the back of the dining area, in an effort to provide better flow throughout the cafe. ReyCon removed a dividing wall separating the two spaces and installed a new museum grade display case over 30 ft. long for student's artwork to be displayed, which serves as

the focal point of the newly renovated space. Paired with the new display case, Reycon also provided new finishes including: a brand-new cafeteria floor, new carpeting, paint, lighting, ceiling grid, a wraparound laptop bar and three new beautiful custom pocket doors separating the space.

“We are really proud of how this project came together and was completed in a short period of time,” said ReyCon president Michael Reynolds. “LCA is one of the most exceptional and innovative prep schools in Massachusetts, and we were excited to have helped contribute to its continued development.”
