Safe Harbor Vineyard Haven installs 32 solar modules/solar panels

November 03, 2023 - Owners Developers & Managers

Vineyard Haven, MA Safe Harbor Vineyard Haven has a brighter future for many reasons. The marina and boatyard has installed 32 solar modules/solar panels on top of its marina offices. Battling the forecasted hurricane in mid-September, the solar energy system was installed and is engineered to withstand up to 140mph winds.

Chris Scott, general manager of Safe Harbor Vineyard Haven and Safe Harbor Edgartown, said, "We are delighted to add solar energy to our Vineyard Haven marina. This new, robust system helps offset our energy usage to become increasingly neutral. The solar installation is part of our organization's focus on renewable energy and environmental stewardship."

The solar project is as large as Eversource will currently permit and includes 32 modules, 400 watts each. The 12.8kW system can generate 16,752kWh annually.

Safe Harbor Vineyard Haven, an AMI Accredited Clean and Resilient Marina, is a full-service facility that includes slips, valet racks (in & out rack service), inside storage, mechanic shop, and fuel dock. An angler's paradise for sport fishing, the surrounding waters are ideal for reeling in striped bass, bonita, bluefish, and more.
