2024 Women in Construction: Sally Gibson, Studio G Architects

March 29, 2024 - Spotlights

Sally Gibson
Sr. Project Manager, Project Architect

What was your greatest professional achievement or most notable project in the last 12 months? One of the most relevant and exciting projects I have been a part of is the new building for Franklin Cummings Tech, a federally designated minority-serving technical institution in Boston. The ground-up, state-of-the-art building will be the new home of Franklin Cummings Tech, which is relocating to Roxbury's Nubian Sq. from Boston's South End. The school's new location will be a key factor in the revitalization of the neighborhood, while also better serving its students through a more accessible and central location. I'm excited to see the benefits this building will bring to both the college and the community it is serving.
